Welcome to the 8th European Coating Symposium.

Since 1995 researchers from both academia and industry have been getting together at the European Coating Symposium to discuss advancements in liquid film coating science and related processes. The ECS Symposium is held biennially in rotation with the International Symposium of Coating Science and Technology (ISCST). The 8th European Coating Symposium – ECS 2009 – follows the series of symposia held for the first time at the University of Leeds, UK (1995) organized by M.D. Savage , followed by the University of Strasbourg (P. Bourgin, France, 1997), the Friedrich-Alexander University (F. Durst, Germany, 1999), van Karman Institute (J.-M. Buchlin, Belgium, 2001), Fribourg (P. Schweizer, Switzerland, 2003), University of Bradford (H. Benkreira, UK, 2005) and the University Paris Diderot (L. Limat, France, 2007). This year **ECS 09** takes place in Karlsruhe, Germany and is organized by the group Thin Film Technology (TFT) at the Karlsruhe Institute of Technology (KIT). Besides the organization of ECS, 2009 was a very eventful year for the TFT group, since the Chair "Thin Film Technology" was founded in 2009 at the Karlsruhe Institute of Technology. KIT is the merger of the Forschungszentrum Karlsruhe, member of the Helmholtz Association, and the University Karlsruhe. This merger has given rise to a research institution of international excellence in natural and engineering sciences with in total 8000 employees.

The scope of ECS 2009 – Advances in Coating and Drying of Thin Films – is to present latest developments and technologies, featuring contributions on fundamental science and applied research. The focus is on the topics: Organic and Printed Electronics, Mass Transfer in Thin Films and Membranes, Rheology of Complex Fluids, Contact Line and Wetting Dynamics, Diffusion and Thermodynamics, Fluid Dynamics with Interfaces, Micro- and Nano-Scale Film Structures, Multilayer Liquid Film Coatings, Bioactive Films and Sensors, Functional Films, and Thin Film Drying.

The domain of "Organic Electronics" is a particularly promising new market representing a challenging area in the field of Liquid Film Coatings and Drying. Products range from Organic Photovoltaics (OPV) to Organic Diodes (OLED), Organic Sensors and more. The first session of the Symposium starts with Invited Talks and contributions in this promising new field followed by more than 80 contributions as oral talks and poster contributions on the different topics. Extended abstracts of the contributions, between 2 and 4 pages long, are gathered in this Conference Book according to the program and the session numbers. Selected papers out of this book are peer reviewed by the Scientific Committee and the TFT group and will be published - after the conference - in a book with ISBN number.

For the first time, we tried to give poster contributions both a 5-minute oral talk and a poster presentation. The poster session will take place at the KARLSRUHE CASTLE followed by a buffet with food and drinks, and listening to jazz music. The Symposium concludes with a post conference tour to the monastery (world cultural heritage) in Maulbronn, including a tour and regional wine tasting.

The success of this Symposium obviously hinges on the help and the efforts of the entire "ECS Local Organization Team" in Karlsruhe, namely myself and Philip Scharfer, Benjamin Schmidt-Hansberg, Sibylle Kachel, Joachim Krenn, Katharina Peters, Lukas Wengeler and Ying Zhou. We all would like to thank you for participating in the 8th ECS in Karlsruhe. It was an honor and pleasure for us to organize this Symposium.

We hope that each of you will benefit from this year's Symposium and your time here in Karlsruhe.

Sincerely,

Prof. Wilhelm Schabel
(ECS 2009 Symposium Chair)
